when employees
need to make calls.***

EVERTECH DIALER APP ON ZAPIER: OVERVIEW

Integrating EverTech with essential business applications you need and use on a regular basis is a key focus for the ongoing evolution of our platform. The new EverTech Dialer App on the Zapier platform is the latest way we're making it easier for you to do business more efficiently.

This intuitive dialer app adds EverTech's proven calling capabilities to your essential business applications — all it takes is a few quick minutes to set it up and start using this valuable new Click-to-Dial capability.

What is Zapier?

Zapier is an online business automation platform that allows users to create custom integrations, or “Zaps”, between a wide range of business applications. Zaps have custom triggers and one or more resulting actions, enabling users to set up specific integrations and automations for their exact needs. From email to accounting, CRM, collaboration and more, Zapier offers compatibility with over 2,000 business tools and platforms including those you are likely use on a daily or frequent basis:

- Quickbooks
- Gmail
- Microsoft Outlook
- Salesforce
- ZenDesk
- Microsoft Office

What Our EverTech Dialer App Offers

With the EverTech Dialer App, employees can quickly add Click-to-Dial capabilities to any compatible application on the Zapier platform. By setting up a Click-to-Dial Zap, users can click any phone number in the compatible applications and instantly start a call in EverTech. Setup options for the EverTech Dialer App include directing calls to EverTech UC, EverTech Mobile or simply the user’s desk phone. The app gives employees control over their calling preferences.

Who Benefits From the EverTech Dialer App?

Creating a Zap that connects the EverTech Dialer App to any of the thousands of compatible applications on Zapier is an easy way to boost productivity and efficiency by simplifying business processes for any employee. One-click access to EverTech’s calling features eliminates time-consuming, interruptive jumps between platforms when employees need to make calls.

And because Zaps can be set up by a user in seconds, there’s minimal administrative work involved with setting up new employees. Admins can quickly connect employees to the applications they need, without installing complex plugins or requiring third-party integrations.

Zapier offers instant integration with over 2,000 different essential business applications — and with our EverTech Dialer App, employees can add Click-to-Dial capabilities to any of them.
